BREAST & BODY – Live Surgery Days, July 7 & 8
2 days | 11 surgeries | 3 theaters

Scientific Director
Prof. Dr. med. Christoph Andree

An Event of
BREAST BODY THINK WIRED!
Endorsed by
IBSA International Breast Surgery Alliance

www.breast-symposium.com
Dear Friends and Colleagues

It is a great honour for me to personally invite you again to the 10th International Breast Symposium Düsseldorf (IBSD) at the Hotel Kö59 (former InterContinental Hotel) situated at the Königsallee. The meeting will be held as a hybrid meeting due to the ongoing situation. Again, we have been able to recruit national and international experts with a great experience in all areas of aesthetic as well as reconstructive breast surgery.

After last year’s great response and success, we will enlarge the spectrum of the BREAST & BODY live surgery day. This year there will be 11 surgeries from three rooms over two days. In our breast augmentation challenge, the surgeons will compete against each other in different rooms but with the same surgery. Same task - different possibilities! The surgeries will be performed with outstanding, well-known Surgeons.

Further, the aim of our 10th Symposium is to have lively scientific controversial discussions together with the participants and the faculty. Again, we will focus on pro- and contra sessions to take the great opportunity to strengthen the multidisciplinary approach between the colleagues to create a platform for an open discussion from different perspectives.

The program is focused to surgical indications and selection of appropriate techniques for breast surgery:

- Reconstructive breast surgery
- Aesthetic breast surgery
- Body contouring surgery
- Breast oncology & reconstruction
- Robotic tools in surgery

Without the time and support from the outstanding faculty and the audience, we would not have been able to accomplish this fantastic program.

I am looking forward to welcome you in Düsseldorf.

Kind Regards
Prof. Dr. med. Christoph Andree

### GENERAL INFORMATION

**B-Lite® Breast Implants**
The world’s first and only lightweight implants

Up to 30% less weight than traditional implants and specifically designed to reduce the long-term unwanted impact of implant weight and pressure on the breast tissue. B-Lite® implants exert the same pressure on the lower pole as traditional implants that are half the size*1.

*Demonstrated for anatomical high profile identically shaped implants
